I have a University identification number (my C#) but I am told that I also have another identification number. Some of my faculty have referred to a number that starts with a “5.” What is this number and is it my real identification number?

Your University identification number (your C#) has not changed; however, you also have a second identifying number in CaneLink that may be used by your faculty. This number, sometimes referred to as your ID, can be found in the ‘Personal Information’ section at the bottom of your Student Center under the ‘Demographic Information’ link.

As you navigate to your Demographic Information, your ID number will be visible at the top of that page.
