

## NSFSBE ALLIANCE SUMMER PROGRAM

### Department of Psychology Requirements for Participation:

- Minimum of 30 undergraduate credits
- 3.00 overall GPA
- Introductory Psychology Course
- Introductory Statistics Course
- Experimental Psychology or Research Methods Course

### Brief Description of the Department:

The Department of Psychology at the University of Miami has offered the Ph.D. Degree since 1959. The clinical program has had APA approval since 1966. Since 1962 the Department has granted over 500 Ph.D. degrees. It is the largest Ph.D. granting department in the University. There are 36 full time faculty. In addition, there are faculty whose primary appointments are in other departments including Biomedical Engineering, Medicine, Neurology, Pediatrics, and Psychiatry. These faculty teach courses, supervise research and practicum, and serve on thesis and dissertation committees.

Each year, the faculty publish approximately 100 journal articles, chapters, and books, and make numerous convention presentations, invited addresses, and colloquia. Faculty are currently involved in externally funded research projects with annual funding levels in excess of \$10 million per year.

Excellent research facilities are available on both the Coral Gables and Medical Campuses. The Department's own microcomputer lab permits most statistical analyses to be done on site. There are laboratories for both animal and human work and facilities for biochemical assays. The University library holds 1.7 million volumes and receives almost 17,000 serials. Cooperative research arrangements exist with the Dade County Public Schools as well as private schools and preschools.

The Department is organized into three divisions and seven programs. The **Adult Division** (Charles S. Carver, Ph.D., Director) contains the Adult Clinical Program. The **Child Division** (Peter Mundy, Ph.D., Director) offers three programs, the Applied Developmental, Clinical Child/Family, and Pediatric Health Clinical. The **Health Division** (Neil Schneiderman, Ph.D., Director) includes the Health Clinical, Behavioral Medicine (non-clinical), and Behavioral Neurosciences (non-clinical) Programs.
